

MADEL KCA-SUB zoning control module: wiring, functions and professional applications

Category: Equipment

written by www.mbsmpro.com | December 24, 2025

The MADEL KCA-SUB is an electronic zoning controller designed to manage up to six independent air-conditioning zones from a single ducted unit. The image shows the KCA-SUB installed in a junction box with its power, relay and sensor terminals visible, offering HVAC technicians a compact and versatile solution for sub-zone temperature control.
