

GMCC PE75H1C Compressor 1/4 HP R134a LBP

Category: Refrigeration

written by www.mbsmpro.com | January 18, 2026

The GMCC PE75H1C is a robust hermetic reciprocating compressor engineered for low back pressure applications using R134a refrigerant. Operating at 220-240V 50Hz, this 1/4 HP motor provides a cooling capacity of approximately 185W. This article provides technical datasheets, electrical wiring schemas, and professional cross-reference guides for global refrigeration maintenance and engineering.
